MEMORANDUM TO ALL MEMBERS

SUBJECT: SAFETY POLICY

Policy Letter 06-01

This policy is applicable to all operations by all CAP members under the assignment to the Southeast Region.

1. Safety and accident prevention is a top priority in the Southeast Region. Safety management responsibility begins at the top and includes Commanders, Staff and Individual members. It is everybody's duty to integrate safety into all operations so that the Civil Air Patrols missions are achieved safely and efficiently.
2. The nature of our Emergency Services operations and other lifesaving missions may require other than normal risk. The acceptance or performance of any high-risk task is permissible only after through assessment of the risk involved by both the crew and the mission tasker.
3. No Mission is so important as to place the members in any situation that will cause unwarranted risk.
4. Safety is an attitude. All members must be constantly on the lookout for unsafe actions or areas. They must report the events and warn others ASAP.

John E Tilton  
Commander
